

Nice, Boss 🤖 — this is exactly how you get strong in SQL + real-world thinking.

I'll give you **high-quality, real-life style MySQL practice questions** based on a typical Netflix dataset (columns like: title, type, director, cast, country, date_added, release_year, rating, duration, listed_in, description).

I've split them into **Beginner → Intermediate → Advanced** so you can level up step by step.

● BEGINNER LEVEL (Foundation – Filtering, Sorting, Basic Aggregation)

◆ Basic Exploration

1. Count total number of shows on Netflix.
 2. Count how many are **Movies vs TV Shows**.
 3. Show all movies released after 2015.
 4. Find all TV Shows with rating '**TV-MA**'.
 5. List top 10 latest added shows.
-

◆ Filtering Practice

6. Find all shows from **India**.
 7. Get all content released in **2020**.
 8. Find movies with duration more than **120 minutes**.
 9. Show all TV Shows with more than **3 seasons**.
 10. Find content where **director is NULL**.
-

◆ Sorting + Limits

11. Top 5 oldest movies on Netflix.
 12. Latest 10 shows added to Netflix.
 13. Sort movies by duration (longest first).
 14. Sort shows by release year (descending).
 15. Find shortest movie available.
-

◆ Aggregations

16. Count number of shows per rating.
17. Count number of shows per country.

18. Average movie duration.
 19. Count shows added each year.
 20. Find maximum movie duration.
-

● INTERMEDIATE LEVEL (Grouping, Case Logic, String Handling)

◆ Group By + Insights

21. Which country produces the most Netflix content?
 22. Count number of movies vs TV shows per country.
 23. Find top 5 directors with most content.
 24. Number of shows released each year.
 25. Count shows per genre (listed_in).
-

◆ Real-Life Business Questions

26. Which year had the highest content addition?
 27. What is the most common rating on Netflix?
 28. Which country focuses more on TV Shows than movies?
 29. Top 10 actors appearing most frequently.
 30. Which genres are most popular globally?
-

◆ Date Handling

31. Extract year from date_added.
 32. Count shows added per month.
 33. Find trend of content addition over years.
 34. Which month has highest content addition?
 35. Find how many shows added in last 5 years.
-

◆ String Operations

36. Split listed_in to analyze genres (use LIKE).
37. Find shows that belong to **Drama** genre.
38. Find content with **multiple genres**.
39. Search shows containing word "**Love**" in title.

40. Find actors whose name contains "Khan".

◆ **Conditional Logic**

41. Categorize movies as:

- Short (<90 min)
- Medium (90–120)
- Long (>120)

42. Classify shows as:

- Old (before 2000)
 - Modern (2000–2015)
 - Recent (after 2015)
-

● **ADVANCED LEVEL (Window Functions, Complex Queries, Case Studies)**

◆ **Advanced Aggregation**

43. Find top 3 countries producing most content (use LIMIT or window function).

44. Rank directors based on number of shows.

45. Find most popular genre per country.

46. Find top actor for each country.

◆ **Window Functions (Important for interviews)**

47. Rank movies by duration within each year.

48. Find latest show added per country.

49. Running total of shows added per year.

50. Find second most common rating.

◆ **Complex Business Case Questions**

51. Which country has highest average movie duration?

52. Find correlation between release year and addition year.

53. Which director has highest average movie length?

54. Find countries where TV Shows dominate (>60% content).

55. Detect growth rate of Netflix content year by year.

◆ Subqueries Practice

- 56. Find movies longer than average duration.
- 57. Find shows released in same year as most popular movie.
- 58. Find directors with more than average number of movies.
- 59. Find genres with above-average content count.
- 60. Find actors appearing in more than 5 shows.

◆ Real-World Analytics (🔥 Must Practice)

- 61. Identify binge-worthy content (TV Shows > 3 seasons).
- 62. Find most consistent directors (content across many years).
- 63. Which genre is growing fastest over time?
- 64. Find top content-producing countries in last 5 years.
- 65. Detect content gap (years with low releases).

◆ Data Cleaning Challenges

- 66. Handle missing director, cast, country.
- 67. Normalize multi-country entries.
- 68. Split multiple genres into rows.
- 69. Convert duration into numeric format.
- 70. Clean inconsistent rating values.

🚀 PRO LEVEL (Case Study Thinking – Very Important)

🔥 Netflix Strategy Questions

- 71. If you are Netflix, which country should you invest in next?
- 72. Which genre should Netflix focus on for growth?
- 73. Is Netflix focusing more on movies or series recently?
- 74. Which type of content has longer duration trend?
- 75. What is the shift in content strategy over years?

💡 Bonus Tip (Very Important for You)

Boss, don't just solve queries — do this:

👉 For each question:

- Write SQL
 - Try optimize it
 - Convert into dashboard insight (Power BI / Tableau)
-

If you want next level 🔥

I can:

- Give **answers (SQL queries)**
- Convert this into a **mini project for your resume**
- Or create **interview-style case study questions**

Just tell me 👉
